PEAbody™

JITC-CERTIFIED ALI DATABASE MANAGEMENT SYSTEM/

It is an honor to call hundreds of Federal agencies and Department of Defense installations our customers. The fact that they rely on our communications solutions – and have for decades – is a true testament to these systems' security, performance and overall reliability – and one in which we are extremely proud.

The JITC-certified PEAbody™ Automatic Location Information (ALI) database solution provides Department of Defense (DoD) installations with private, independent and secure on-site storage of phone location data.

Whether used as the primary ALI database, accommodating up to two million call records, or in conjunction with the public safety ALI database, the PEAbody solution's functionality allows users to accurately identify the location of telephone extensions in a Private Branch Exchange (PBX) or Centrex environment.

The PEAbody solution is made up of five main components, which work together to create and maintain a comprehensive ALI database and include:

- 1. Administration** - Creates call center records, configures serial port connections, starts the PEAbody server, issues system messages and manages call center operations.
- 2. Maintenance** - Creates files, stores ALI records and prints reports on record information.
- 3. Audit Trail Report** - Previews and prints a list of any changes made in ALI records within a specified range of dates and times.
- 4. Log Report** - Previews and prints a list of all ALI requests made within a specified range of dates and times.
- 5. ALI Update** - Updates ALI records with information from your database.

SERVER RECOMMENDATIONS

As part of our commitment to ensure complete customer satisfaction, Airbus DS Communications will provide server recommendations for your organization's PEAbody™ solution deployment, and can even supply a complete hardware and software package to include: the general server, operating system, computer, memory (RAM), backup device, network interface and more.

YOUR TRUSTED PARTNER

For over four decades, Airbus DS Communications has designed solutions with an open mind, creating smarter ways to keep all our communities safe. Today, we support more than 60% of all U.S. Public Safety Answering Points, serving over 200 million people, along with hundreds of private sector businesses in 20+ different industries, including transportation, utilities and healthcare. As the world's largest and most reliable source for Next Generation 9-1-1, Land Mobile Radio and Emergency Notification, we keep people connected when it matters most.

With enhanced 9-1-1 systems installed at nearly 150 DoD installations around the world, we understand how our service members and their families live and work, and provide solutions that meet their unique requirements, helping preserve the safety of those who secure us all.
